Finally, I'm Releasing My Findings In A Cookbook That Will Change Your Life Forever. If You're Tired Of Bland, I'm Here To Tell You There Is An Alternative...

September 01, 2018

Dear Friend,

Living with diabetes is NOT easy... cooking with diabetes can be even harder! But things are about to get much better for you...

Whether you're dealing with Type 1, Type 2, or Gestational Diabetes Mellitus (GDM), the disease affects every part of your life... not the least of which is the food you eat every day.

⭐ Your doctors tell you that you'll never be able to eat a "normal" diet again...

⭐ Friends and family don't know how to cook so-called "diabetic food," so if you're invited to their gatherings at all, you end up with meals that taste more like cardboard than something edible...

⭐ And, even if you or your loved one has been living with diabetes for a long time, you still have questions, doubts and fears about what you can and cannot eat...

The result is that you feel trapped and helpless.

Food turns into your enemy.
And, something as fundamental as eating a great breakfast, lunch or dinner becomes a nearly impossible minefield to navigate.

- Your diet turns into the most **basic, boring and bland** collection of foods possible.

  And, that's because unfamiliar foods and new recipes don't feel exciting, they're **life threatening**.

- You don't think in terms of how good something tastes, but rather how many carbohydrates, starches, sugars and fats it contains.

  **Food is no longer something enjoyed**; it simply becomes a medical necessity just as much of a scientific fact as *that* insulin shot...

- And, you've long since given up on the idea of ever returning to the foods and recipes that you so **desperately crave**.

  Even though those delectable snacks, desserts, treats and beverages that constantly seem to always be right there taunting you!

But, I don't need to tell you any of this... **you know it all too well.**

Whether recently diagnosed, or you or a loved one has been living with diabetes for years, every food choice you make must take the disease into very real consideration.

*And that's a bummer because you know better than anyone else that...*

**Most Diabetic Recipes Are About As Tasty As The Paper They're Printed On...**

As a diabetic myself, I searched for years to find a quality cookbook that would not only help me **create quick, easy and satisfying meals**, but ones that tasted great **AND** were safe for me... **I had NO luck.**

For years, I scoured the web, bookstores, and libraries to find any cooking resources that would make my **life easier** and the food I ate more enjoyable... **again I had very little luck.**

And, for years, I knocked on the doors of established dieticians, chefs, and restaurants to see if they had any special recipes that would help me **take the boring out of every meal**... **I was met with more closed doors than I care to remember.**

I was shocked at how few cookbooks, recipes or even interesting food ideas are out there for diabetics:

- It seemed that the doctors are more interested in telling you **what you can NOT eat**, than shedding light on what you can.

- It seemed that cookbook publishers must think there's not a big enough demand, so they don't bother creating quality resources.
And almost everybody else involved in the food industry seemed okay with just repackaging the same ol' boring recipes that have been around for decades.

To say I was disheartened by what I found (or didn't find) is a total understatement. It seemed to me that...

Eating Should NOT Have To Be So Hard For Diabetics... But, Sadly, It Is!

When you break it down, the problem you're facing shouldn't be that difficult to solve:

1. You or your loved one has diabetes.

2. You want to be able to eat as good as - or better - than you ever have before... or at least find recipes that don't taste awful.

3. And, you want to be shown exactly how to create simple, fast and mouth-watering dishes without having to convert "traditional" recipes into diabetic-safe ones.

That's not too much to ask, is it?

But, you have no idea how to get started. And, that's a problem.

Or, if you do have an idea how to begin, you're overwhelmed by everything it'll take to do the conversions, substitutions, and exchanges to make your recipes safe. That's a problem, too.

It feels like a ton of work, doesn't it? Particularly if you can't afford to spend all day in the kitchen every day... and who has that kind of free time?!

First of all, go easy on yourself.

If you're feeling any of these things, you're definitely not alone... just like you, diabetics everywhere are faced with this same sort of challenges at every meal.

Especially if you're newly diagnosed, it's not like you ever had to think about these types of things before, so it's hard to even know where you're supposed to start, right?

But, the good news is...

You don't have to settle for cardboard food.

You don't have to struggle to make something that tastes great AND is good for you.

That's because you can finally...

Treat Yourself To The Taste You Deserve.
When I saw how little was out there for diabetics, I decided to make a difference.

I decided to create the world's best diabetic cookbook. Go big or go home, right?!

I decided to develop a cooking resource filled with so many amazing recipes that it would blow your mind and delight your tummy... so you could eat better than almost everybody else in the world, every day!

As a result, over the past three years, I've worked with a team of incredible dieticians, chefs and food lovers to create a compendium of the most delicious diabetic-friendly recipes ever gathered in one place!

⭐️ I want you to experience what eating truly great food every day can feel like.

⭐️ I don't want you to have to struggle with the same obstacles as you do now...

So, with much trial and error, I created a best-in-class cookbook that is filled with easy-to-make mouth-watering recipes that will show you everything you need to know to quickly begin cooking like a gourmet pro - all while being totally diabetic-friendly!

Nowadays it seems that everyone - from doctors to chefs and everybody in between - is confused about what you can and cannot eat.

The status quo solution has been for the "experts" to focus on all the foods you CANNOT eat and to offer you a very, very small list of foods that you can eat.

This kind of fear-based approach is exactly why there are so few innovative and great-tasting recipes out there - nobody wants to take the time and effort to make a really valuable resource for you.

And, that's why you're here today searching for a cookbook that can really make a difference in your life.

You can either keep living like so many other diabetics with a poor selection of food choices; you know, the boring meals you've been eating ever since you were diagnosed... and the limited number of ingredients you were led to believe were the only ones you could choose from,

OR

⭐ You can take advantage of a groundbreaking new cookbook that will totally change the very way you think about food forever; with great tasting recipes, snack ideas and helpful hints that will open up a totally new way of eating and enjoying food that you thought was lost forever...

The choice really is yours, but please believe me when I say...
